

# National Energy Action CONSULTANCY SUPPORT FOR COMBINED AND LOCAL AUTHORITIES

**TAILORED SOLUTIONS TO TACKLE  
FUEL POVERTY AND ACHIEVE  
CLEAN ENERGY GOALS**

**National Energy Action (NEA)** is the leading fuel poverty charity, with over 40 years of experience working across England, Wales, and Northern Ireland. We ensure that everyone can afford to live in a warm, safe, and healthy home.

Local and combined authorities face increasing pressure to tackle fuel poverty, meet decarbonisation targets, and support vulnerable households—all while managing tight budgets and limited resources.

NEA's tailored and experienced consultancy services provide practical solutions to these pressing challenges.

# Our services

## Strategic Planning

We work with local and combined authorities to craft Affordable Warmth Strategies that balance ambition with practicality, helping you meet targets and deliver outcomes while staying within budget.

## Energy Efficiency Programmes

NEA supports the development of cost-effective initiatives that reduce energy consumption and improve home insulation, helping local and combined authorities tackle both fuel poverty and environmental goals.

## Training and Skills

Equipping staff with the expertise and confidence to navigate the complexities of fuel poverty, health, and decarbonisation through flexible training options (both in-person and online). Our training not only ensures your staff are well-prepared to implement energy projects but also focuses on supporting and engaging people effectively. We also support skills development, helping communities to improve their employability and build long-term career prospects.

## Education

We offer comprehensive workshops, assemblies, and lessons for primary and secondary schools in your area covering essential topics such as: energy efficiency and wastage; renewable technology; net zero; and Gatsby benchmarks. By partnering with schools in your area, we provide students with a deeper understanding of green skills and exciting career opportunities in the energy sector, inspiring our next generation of energy professionals.

## Partnership Building

We facilitate cross-sector collaborations, enhancing resource-sharing and collective problem-solving, to help local and combined authorities maximise impact and efficiency.

## Product Innovation Trials

Testing innovative technologies in fuel-poor households to find scalable solutions that improve energy efficiency, comfort, and health, while advancing decarbonisation efforts.

## Community Engagement

Leading outreach to raise awareness and meaningfully engage residents in energy-saving initiatives, ensuring that solutions are well-adopted, and communities feel supported.

## Data Analysis and Evaluation

Providing in-depth monitoring and evaluation to track the progress and impact of energy projects, offering insights that help authorities refine future interventions.

With over four decades of experience, NEA empowers local and combined authorities to address fuel poverty, meet decarbonisation challenges, and improve community well-being despite limited resources. We support local and combined authorities by capturing their experiences, which feeds directly into our campaigning and policy work, ensuring that their voices are reflected in the wider conversation to influence meaningful change.

**Together, we can create a warmer, healthier, and more sustainable future for everyone**
